- E-flare™ Protector Beacon**
www.eflarecorp.com
1. Always use quality alkaline **D** cells.
 2. Install new batteries with **+** terminals towards lens. Do not mix types.
 3. Make sure cap is tightened as far as possible to engage O-ring.
 4. To switch beacon on, rotate lens clockwise; off, counter-clockwise.
 5. Stand beacon vertical in base on a firm surface, or use cone mount clip.
 6. Replace batteries when yellow LED indicator lights up.

Cone Mount Clip

Attaches to any Eflare Beacon to enable vertical positioning of the beacon on most types of cones.

Magnetic Clip

Attaches to any Eflare Beacon. Not suitable for moving vehicles.

Rubber Base Mount

General purpose mount for all Eflare Beacons.

Magnetic Base Mount

Combined Magnetic Base and Cap. Can be used with any Eflare Beacon. Rated to 80 KPH when securely mounted on vehicle.

Winning Eflare Beacons

TF 510

Flashing in either red or amber, another twist of the lens switches on a bright torch.

TF 610

This marine product not only floats but has three separate safety functions: white flash, steady-on or torch.

EF 300

The compact but high performing beacon with either a red or amber flash.
